

Business Services

Company Summary

We are a professional services firm delivering AI-powered software and technical solutions to companies who want to leverage data and machine learning algorithms for business value. Focusing on predictive analytics, natural language processing, and computer vision, we help businesses innovate with AI, enrich customer insights, automate processes & be more cost-efficient. This is ensured by our proprietary technologies, exceptional customer care, constant investment into talent development and R&D.

Services

- **Outsourcing and consulting in business analytics** - Due to the covid-19 pandemic most companies are struggling to find the best human resources to help them in analytics. We have developed a model that includes a pool of qualified and accredited consultants who are deployed on premises.
- **Building and deploying customized solutions** - We have developed solutions that are market ready for the client through Business Intelligence Solution, Azure Solutions, Machine Learning Models & other Software Solutions.
- **Azure AD Password Protection for Active Directory Domain Services with PowerBI reporting** - How secure are passwords on your premises. How do you guard against spray attacks from hackers? Azure Active Directory Protection for Active Domain uses Microsoft curated list to scan for weak passwords, give a report for the weak password. The customer can use a custom list in addition, according to the organization culture on common passwords in addition to the audit.
- **Data Analysis** - The process whereby we evaluate data analytical and statistical tools to discover useful information and aid in business decision making. In which we use platforms like Microsoft SQL Server, SAS (Statistical Analysis System) for data management, advanced analytics, multivariate analysis, business intelligence, criminal investigation, and predictive analytics.
